E-mail: kris@ksmediaonline.com

Objective: To further develop my multimedia skills and creativity. Not only will I build my portfolio with my achieved knowledge, I will strive within a team environment continually advancing my skills.

Summary of

Qualifications: After a few years of experience in the multimedia industry on my own, I have developed a keen understanding of the skills necessary to create rich multimedia. Ranging from graphic design, to web design, and video editing, the skills I have achieved are the necessities of today's commercial endeavours. Software I have gained experience with include; the Adobe Creative Suite 3 (Dreamweaver, Flash, Director, Photoshop, Illustrator), Adobe After Effects, Adobe Premiere, 3D Studio Max, Microsoft Office Suite (Word, Powerpoint). Furthermore, I have been continuing to grow as a designer. Working on several websites since graduating in 2005, I have learned what it takes to get websites up and running, while keeping my clients' vision my first priority.

Education: 2003-2005 Fanshawe College London, Ontario
